-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andrade et al 4,506,606 in view of EP 1078823 and Fornsel et al 6,265,690.

Andrade et al teaches use of plasma, see paragraph 2 in column 7, to treat silicone materials as claimed. Use of a rotating plasma head is not taught nor use of platinum catalyst to effect the treatment. The patent to EP 823' clearly show use of a platinum catalyst mixed with POS and Si/H material with platinum as a catalyst to effect the film

having enhanced qualities and in view of this teaching it would have been obvious to modify the Andrade et al system with these materials to effect enhanced adhesion and infiltration qualities of the film produced. The patent to Fornsel et al is applied for evidencing that a rotating head plasma torch can produce a superior coating of similar materials and in view of this teaching it would have been obvious to further modify the Andrade et al system to use a rotating head plasma torch to treat the material, such torch leading to more uniform coating parameters. Use of a repeat step or use of specific plasma parameters as per claims 2 and 3 are considered routine and obvious choices dependent on the end use of the device and other undisclosed material parameters.
